Robert E. Stewart Engineering Humanities Award

The Robert E. Stewart Engineering-Humanities Award acknowledges and perpetuates Robert Stewart's lifelong dedication to the social and cultural contributions that agricultural engineering makes to the quality of life and to the application of the humanities to engineering research, design, developments and teaching.

The award was designed to "recognize outstanding contributions to the advancement of the interaction of the profession and the humanities". The award was established in 1986 by his wife, Bonnie Stewart, as a tribute to Robert Stewart, past president and ASABE fellow. Honorees receive a plaque.
