Henry Giese Structures and Environment Award

The Henry Giese Structures and Environment Award is given “For distinguished service in advancing the knowledge and science of agricultural structures and environment”. Honorees are chosen based on their advancement of teaching, research, design, and basic knowledge of agricultural structures and environment including livestock and poultry buildings, plant growth structures, crop and other storage processing

structures, and rural human housing. The award was established in 1988 by the family of Henry Giese to honor his lifelong accomplishment in farm building design, research, and teaching.

Honorees are awarded an engraved plaque.
