

## Technological Contributions Awards

# International Food Engineering Award

The International Food Engineering Award recognizes food engineering professionals from all parts of the world who have made significant engineering contributions in research, development or design of food processes significant to the food industry; and in outstanding leadership, management or education to advance the food engineering profession.

The award consists of a \$1,000 cash prize, travel expense reimbursement up to

\$1,400 to receive the award at the ASABE Annual International Meeting, and a plaque.
